

- 1 Presenter uses a wired or wireless microphone which can connect to self-powered PA or to existing sound system. One cable provides a feed to the interpreter's monitoring unit

- 2 Interpreter Monitoring Unit receives a feed from sound system or directly from any existing microphone. Headphone plugs in to Monitoring Unit

- 4 Audience uses receivers with comfortable dual headsets to listen to their language and have control of their volume levels

- 3 Interpreters headset microphone connects directly to transmitter

- 5 Rugged military-grade case provides adjustable dividers for easy system management and unsurpassed protection.

Carrying cases include retracting handles and wheels for easy transportation.

This system is designed to work as follows:

- 1 Easily connects to any existing PA system or any microphone directly with included Universal Connection Kit
- 2 With Monitor Unit your interpreter has the advantage of being able to listen directly to presenter and can now hear better, concentrate, and overall do a better job of interpreting
- 3 The interpreter's microphone easily connects to transmitter. Transmitter has a 500 foot range for maximum clarity and sound quality
- 4 Each audience member uses their own receiver and headset and can listen to their language clearly with individual volume level adjustment
- 5 Making equipment management and transportation easy this rugged military-grade case will keep your investment safe for years and years to come

LIFE-TIME TRANSFERABLE WARRANTY This system can be configured easily to any number of receivers (up to 2,000) and can manage up to 8 languages
